

Description:

Algecal® C is a Vitamin & mineral combined preparation which is natural & convenient solution for bone health and immune support.

Indications:

Osteoporosis, increasing bone mineral density, boosting immune response.

Mode of Action:

Calcium is absorbed in the intestine which then passes through the intestine to blood & deposited into bone.

Vitamin C acts as an antioxidant to protect immune cells, supports collagen synthesis for tissue integrity, enhances the function of immune cells like phagocytes, exhibits antiviral properties and stimulating interferon production, modulates inflammation to balance immune responses, maintains skin and mucous membrane barriers against pathogens.

Why is Algecal® C unique?

- Only plant source Calcium
- Only Calcium that provides human bone health study
- Only Calcium that provide safety study on pregnant women
- Only Calcium that improves bone mineral density
- Only unbleached Calcium
- Only calcium that doesn't cause acidity & constipation
- Provides good synergistic effect.
